

# WALKLET A MODULAR SIDEWALK EXTENSION SYSTEM

Walklet is a turnkey solution that allows temporary sidewalk extension to take place quickly and easily. It's already designed to meet San Francisco's permit requirements.\*

DESIGNED BY REBAR // WWW.REBARGROUP.ORG

\*The San Francisco Planning Department has created a permit system that provides for the extension of the sidewalk into the parking lane. Permit applications are now available. Download the application at:  
<http://sfpavementtoparks.sfplanning.org>

## CASE STUDY: 22ND & BARTLETT // MISSION DISTRICT, SF

### 23 MODULES // 3 METERED PARKING SPACES

Merchants along this busy pedestrian corridor agreed to care for this new, temporary public space. Although the space is open to the public rather than commercial, the Walklet can be programmed to accommodate the needs of the local community, business clientele, and the general public.

### BEFORE WALKLET INSTALLATION

### AFTER WALKLET INSTALLATION

# A MIX-AND-MATCH, MODULAR SYSTEM. CREATE YOUR OWN PROGRAM:

## SIMPLE SEAT

Find space to walk, a spot to sit, and room to breathe in a crowded urban space. Our simple bench does it all.

## HIGH TABLE

Pause for a coffee, a slice, or a chat at our tall table. This perch also provides a nice visual barrier between sidewalk and street.

## DEEP SEAT

Relax and put your feet up, lounge in the sun, or spread out an entire picnic on our most accommodating urban surface.

## SIMPLE PLANTER

Provide seating and green space in one fell swoop. Plant vertical species like bamboo for shade and a friendly visual barrier.

## SIMPLE EXTENSION

The ultimate space-maker, our sturdy filler platform will expand your sidewalk horizons. Also available with a bike rack attachment.

## DEEP PLANTER

Natural shade is easy with our deep planter box, which can easily accommodate a large box tree plus ground cover.

## END RETURN

Provide a stylish entry into your new public space with our angled cap piece.

## WALKLET // TECH SPECS

- Frame: hot dipped galvanized structural steel.
- Clearance: accepts most road crowns. Leveling feet adjust from .5" to 2.5". Modules are designed to create a 2% pitch to shed water.
- Slope: longitudinal road slope should be < 5%.
- Walklet modules interlock with each other. Modules can be bolted to sidewalk as well. Bolting is generally not necessary due to combined weight of installation.
- Decking: rapidly renewable, engineered bamboo or FSC-certified tropical hardwood available. All decking is 5.5" wide x 0.8" thick, with 1/4" gaps. Decking is installed pre-finished on all faces.
- Styling: custom colors available. Custom waterjet-cut patterns in planter, seat and table sides also available.
- Walklet dimensions: each measures 80" x 36". Each module occupies 3 feet of curb length.
- Planters and seats: side panels are plate steel, galvanized, with additional industrial finish available in a variety of colors. Can be spray or powdercoated. "Deep planter" accepts 24" box tree. All planters are 19" deep.
- Seat height: 20 inches for all seats and planters. High table height: 42".
- Railings: optional railing system includes 36" high posts on end of each module. Can be customized to cover any length of installation. Cable rail system with 3.5" spacing included.
- Fascia skirt: galvanized steel fascia trims street-edge of each module. Serves as trash barrier.
- Clean out: each module can be cleaned beneath by accessing street through removable deck plank at gutter.
